

MICROPARK KIOSK

Parking made simple.

The Microlog kiosk is made to last. The components used are only industrial which means that you will be able to rest assured through its life span. Our unattended kiosks are versatile and flexible both for the parking operator and the car owner. The GUI is customer adapted through many years of development, and the accelerated payment device is a real queue buster.

SECURITY

Secure Remote Control of the payment device.
All communication is encrypted via VPN.
